

Jayesh Choudhary

Software Developer | Java | MERN Stack

Bangalore, Karnataka | +91- 8660629894 | jayeshchoudhary9503@gmail.com | [Github](#) | [LinkedIn](#) | [Portfolio](#)

EXPERIENCE

Freelance Software Developer | Self-Employed

Bangalore, India | 2026

- Developed BillNest, a full-stack billing and quotation management application using Node.js, Express.js, MongoDB, and EJS.
- Implemented billing, quotation generation, inventory management, and money management features.
- Designed REST APIs and MongoDB schemas to support business operations.

Software Developer | Independent Projects

2025 – Present

- Developed full-stack applications using React.js, Node.js, Express.js, and MongoDB.
- Built REST APIs, authentication systems, and database-driven applications.
- Applied OOP, DSA, MVC, CRUD, and database design concepts across projects.

EDUCATION

Master of Computer Applications (MCA)

PES UNIVERSITY, Bangalore | Expected Graduation: 2028

Bachelor of Computer Applications (BCA)

OM SAI DEGREE COLLEGE — BANGALORE UNIVERSITY | 2026 | CGPA: 7.72

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML, CSS

Frontend: React.js, EJS, Vite, Bootstrap, Tailwind CSS, React Router, Axios, Redux

Backend: Node.js, Express.js, Mongoose

Databases: MongoDB, MySQL

Tools: Git, GitHub, VS Code, Postman, Render, Vercel

Concepts: DSA, OOP, REST APIs, MVC, Authentication, JWT, CRUD, API Development, Database Design

Currently Learning: TypeScript, Docker, CI/CD, AI Integration

PROJECTS

1. JiludB | Java, OOP, Data Structures

([Source Code](#))

- Built a lightweight document-oriented NoSQL database from scratch in Java using a Database → Collection → Document architecture.
- Implemented CRUD operations, custom serialization, and file-based data persistence with save() and load().

2. Telegram Drive | MERN, Telegram Bot API, JWT

([LiveLink](#))

([Source Code](#))

- Built a cloud-storage-style application using Telegram Saved Messages for file storage and retrieval.
- Implemented authentication, folder management, file uploads, Telegram file integration, and protected API routes.

3. URL Shortener | MERN Stack

([LiveLink](#))

([Source Code](#))

- Built a full-stack URL shortening service using React, Node.js, Express, and MongoDB.
- Implemented unique short URLs, REST APIs, rate limiting, and deployment with Vercel and Render.
