

Jayesh Choudhary

Software Developer | Java | MERN Stack

Bangalore, Karnataka | +91- 8660629894 | jayeshchoudhary9503@gmail.com | [Github](#) | [LinkedIn](#) | [Portfolio](#)

EXPERIENCE

Freelance Software Developer | Self-Employed | Bangalore, India. **January 2026 - August 2026**

- Developed BillNest, a full stack billing and quotation management application using Node.js, Express.js, MongoDB, and EJS.
- Implemented billing, quotation generation, inventory management, and money management features.
- Designed REST APIs and MongoDB schemas to support business operations.

Software Developer | Self-Directed Projects **2025 – Present**

- Developed full-stack applications using React.js, Node.js, Express.js, and MongoDB.
- Built REST APIs, authentication systems, and database-driven applications.
- Applied OOP, DSA, MVC, CRUD, and database design concepts across projects.

EDUCATION

Master of Computer Applications (MCA) | PES UNIVERSITY , Bangalore **2026-2028**

Bachelor of Computer Applications (BCA) |

OM SAI DEGREE COLLEGE Affiliated with BANGALORE UNIVERSITY **2023-2026**

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML, CSS

Frontend: React.js, EJS, Vite, Bootstrap, Tailwind CSS, React Router, Axios, Redux

Backend: Node.js, Express.js, Mongoose

Databases: MongoDB, MySQL

Tools: Git, GitHub, VS Code, Postman, Render, Vercel

Concepts: Data Structure & Algorithm, OOP, REST APIs, MVC, Authentication, JWT, CRUD, API Development, Database Design

Currently Learning: TypeScript, Docker, CI/CD , AI Integration

PROJECTS

1. J-Drive | MERN, Telegram Bot API, JWT [\(LiveLink\)](#) [\(Source Code\)](#)

- Used by **30+ active users** and currently improving rate limiting, request handling, and performance for higher concurrent traffic.
- Built a secure cloud storage platform using **React, Node.js, Express, MongoDB, JWT, and Telegram Bot API** for file storage and management.
- Implemented authentication, folder management, file **upload,download,preview,delete, authorization**, and **user specific Telegram storage configuration**.

2. JiluDB | Java, OOP, Data Structures [\(Source Code\)](#)

- Built a lightweight document oriented NoSQL database from scratch in Java using a Database Collection Document architecture.
- Implemented CRUD operations, custom serialization, and file based data persistence with save() and load().
- Used Java data structures and OOP principles to design document storage, collection management, and database operations.
